WHAT IS AN AGENT

An agent does the work.

It doesn't just talk. It decides, and it acts.

A chatbot answers questions. **An agent gets it done.**

AGENT VS CHATBOT

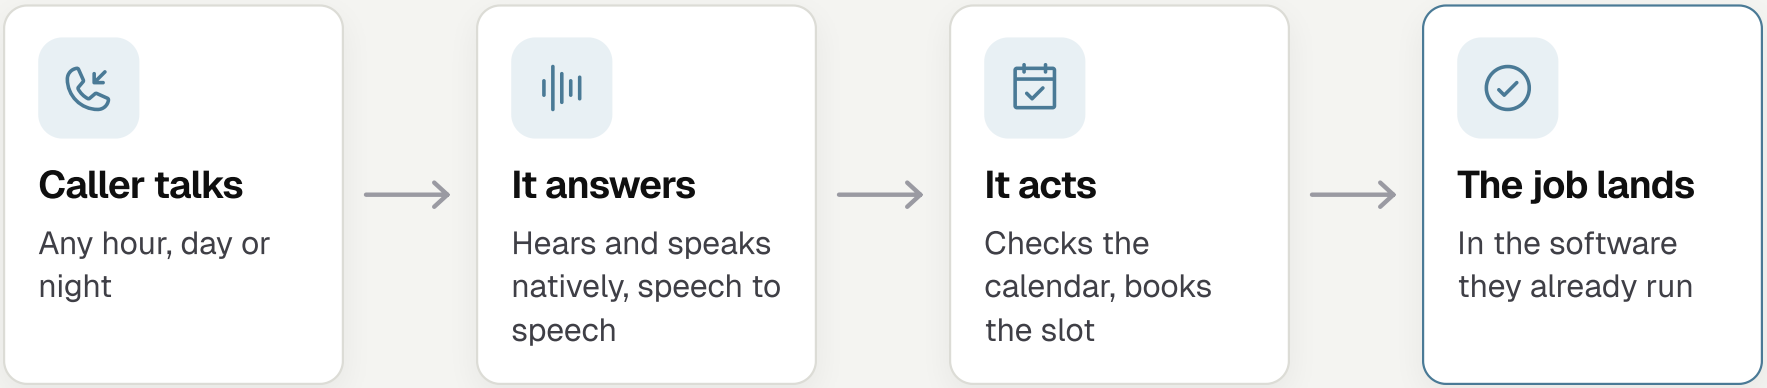

Same chat window. Different job.

CHATBOT	AGENT
Answers questions	Books the appointment
Follows a fixed menu	Understands what they mean
Sends you a transcript	Updates the CRM itself
Hands off when it's stuck	Finishes the job

PICK THE INDUSTRY

The 3-question test.

Does winning the phone actually win the job?

Lots of inbound calls

Dozens a day, not a handful.

The owner's own phone rings

Not a national call center that answers for them.

The customer picks who to call

Not an insurer or broker assigning the work.

Three yeses: sell there. One no: move on.

YOUR ONE-LINER

Say this to every owner.

> **“I set up an AI agent that answers every call and text, and books the job into the software you already run.”**

Lead with where the appointment lands. Not with how the AI works.
