Leadlock.ai

THE TARGET

One good lead looks like this.

BUSINESS	OWNER	EMAIL	PHONE	ADS
Summit Plumbing & Drain	Mike R.	mike@summitplumb.com valid	(303) 555-0142	Running

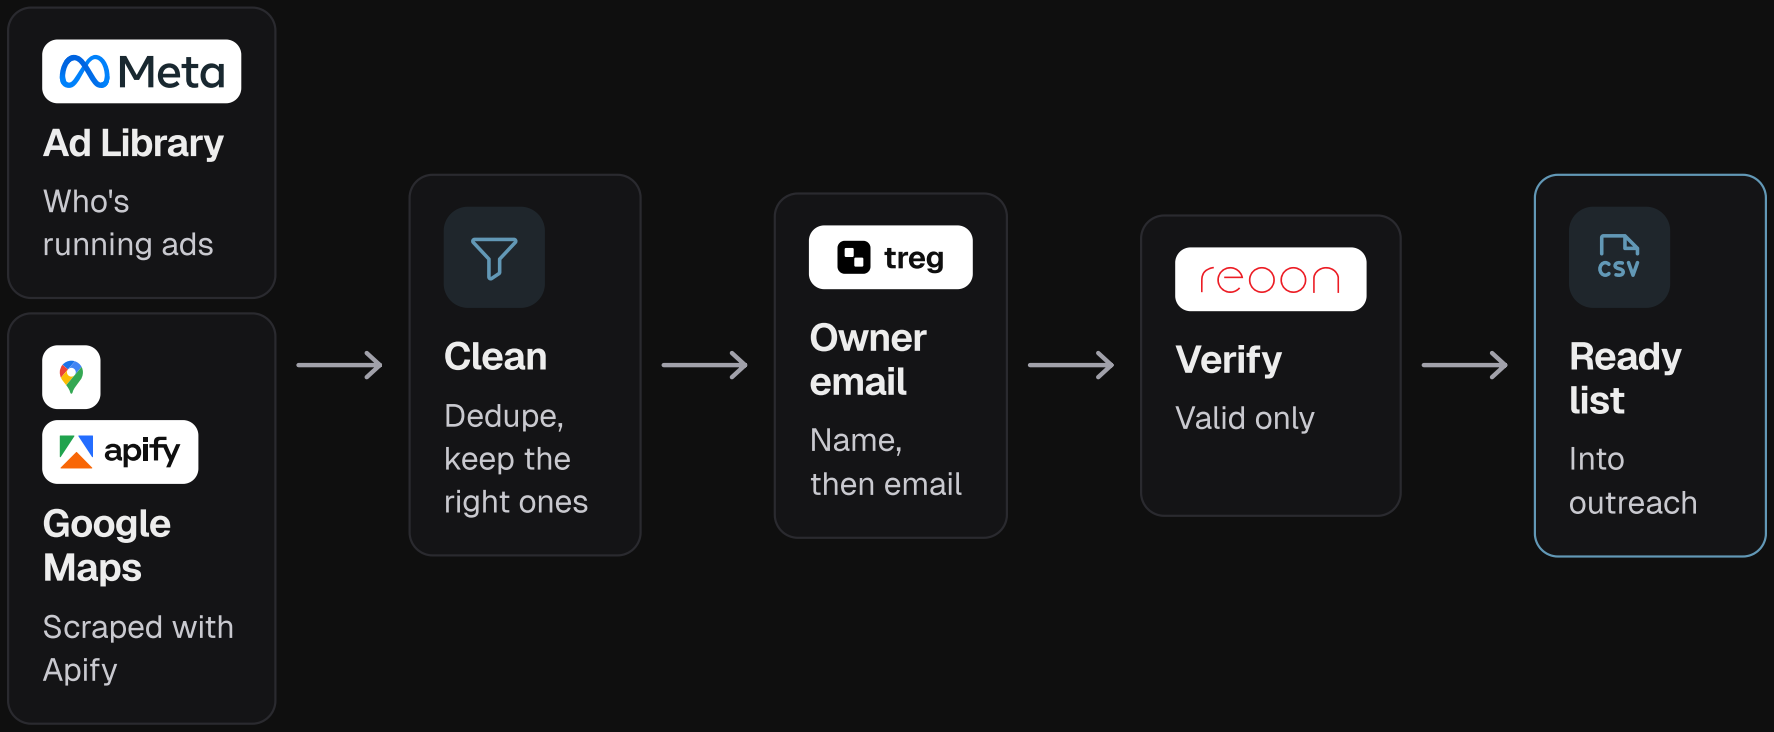

Owner name, verified email, phone. Missing one? Still call or DM.

Made-up example row.

Leadlock.ai

THE FLOW

Five steps, one CSV.

Leadlock.ai

SOURCE 1

Facebook Ad Library.

Who's running ads right now is who's paying for leads.

Meta

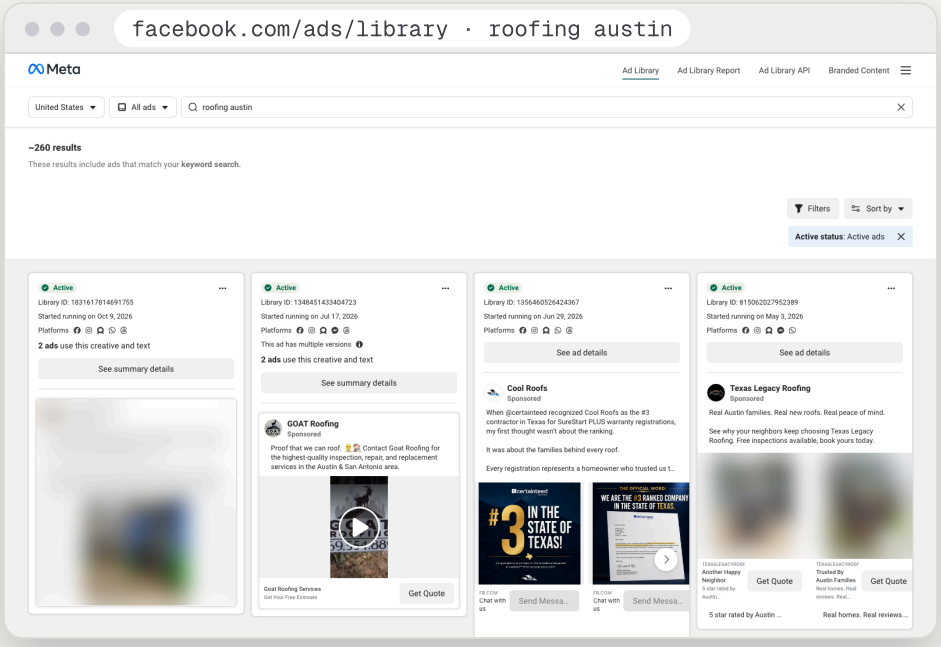

01 facebook.com/ads/library

02 United States, All ads

03 Search a trade and a city

04 Open each advertiser: website and phone

At scale: Apify's Facebook Ads Scraper (apify/facebook-ads-scraper).

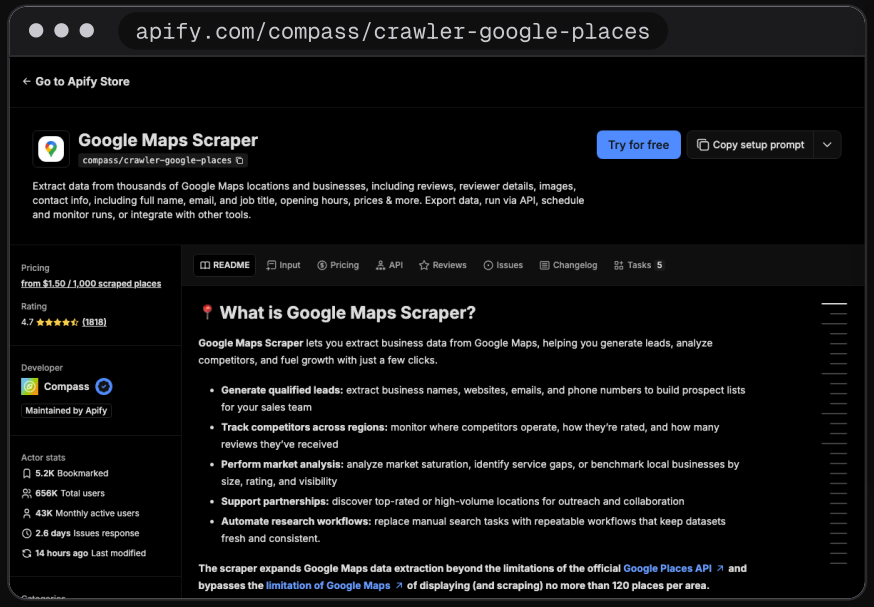

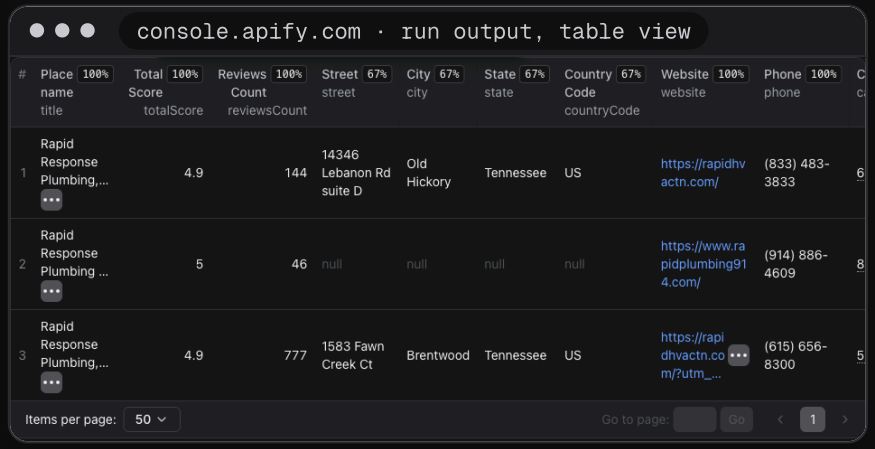

Meta Ad Library, public search, 2026-10-20. A private person's ad and customer photos are blurred.

Leadlock.ai

SOURCE 2

Google Maps, with Apify.

Phone and website

The two columns everything else hangs off.

Apify Store page (public) and an existing run's output table, 2026-10-20.
Apify lists it from $1.50 per 1,000 places; your plan sets the rate.

Leadlock.ai

CLEAN

Keep the good ones.

DROP	KEEP
⊗ No website, no phone	✓ Website and phone
⊗ National brand or call center	✓ Owner-run, local
⊗ Everything else	✓ Your target trade

THE OWNER'S EMAIL

TREG: one key, many email finders.

treg

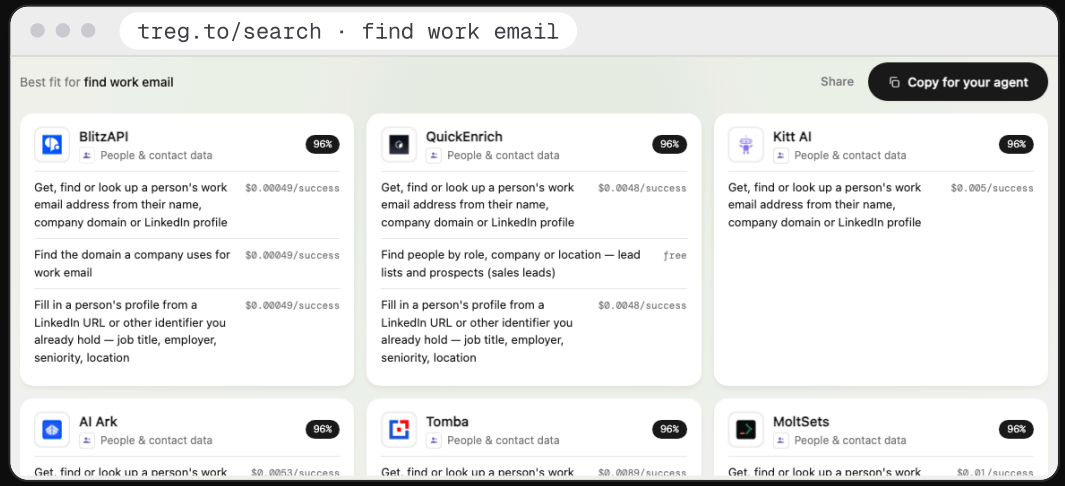

What it does

Give it a business website or name. It finds the owner's name, then their work email.

PUBLISHED PRICE, PER HIT

$0.00049 to $0.15

Depends on which provider answers. New accounts get $1.00 free, once.

treg.to catalog, 2026-10-20: treg.people.email.find $0.000495 to $0.15 per hit; treg.people.search $0 to $0.30 per hit; $1.00 free once for new verified accounts.

Leadlock.ai

HOW I USE TREG

Domain in. Owner's email out.

Website domain

From the Google Maps row

→

Owner's name

TREG people search

→

Owner's email

TREG email finder

→

reoon

Checked

Reoon, next slide

ONE REAL RUN

$0.84 → 13 owner names, 9 new verified emails

SKIP

info@ and office@

Owners rarely read them.

One Leadlock list run, 2026-09-10: 157 rows, $0.84 of TREG credit, 13 owner names, 9 new verified addresses.

Leadlock.ai

VERIFY

Verify before you send.

reoon

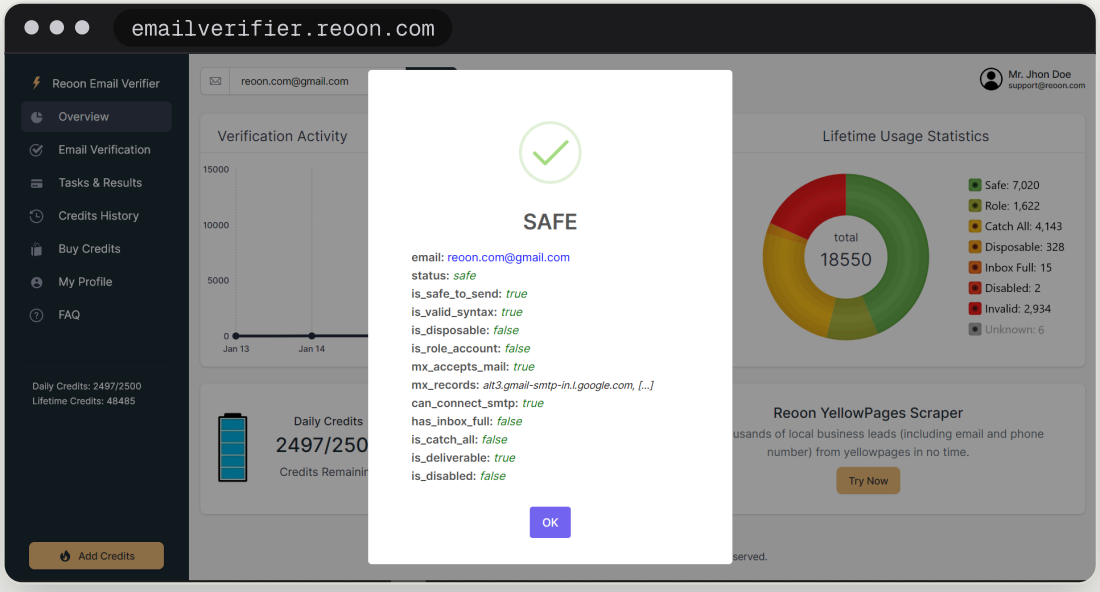

Valid: send

Catch-all: careful

Small batches only.

Invalid: drop

Bounces hurt your sender reputation.

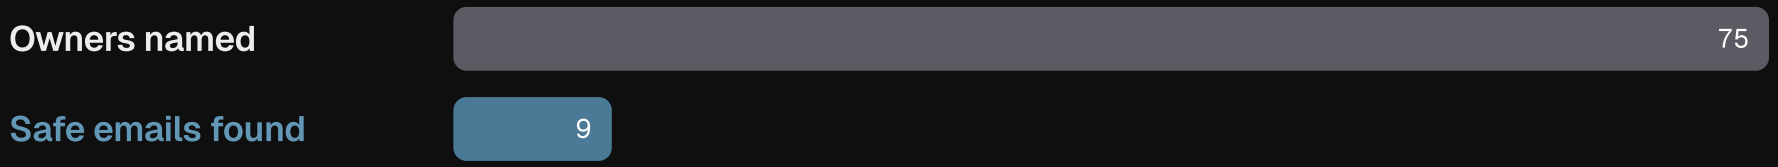

Reoon's own product screenshot (sample data). Reoon offers up to 600 free verifications every month (reoon.com, 2026-10-20).

Leadlock.ai

REAL NUMBERS

Not every row gets an email.

1 in 8 named owners got a safe email

That's normal. Call and DM the rest.

One Leadlock list run, 2026-09-10: pattern guess plus verification, 75 named owners, 9 safe addresses.

Leadlock.ai

LEADLOCK LEAD FINDER

Leadlock Lead Finder does all of this for you.

Finds who's running ads

Facebook Ad Library, your niche and city

Finds every business

Google Maps: website, phone, rating

Removes the doubles

One row per business

Finds the owner

Owner's name, then their own email

Checks every email

Only safe addresses marked ready

Shows the cost first

Worst case before a run; --max-spend stops it at your cap

Included in the Launch Bundle AT SIGNUP or on its own

Leadlock.ai

LEADLOCK LEAD FINDER · THE WHOLE RUN

One command, five steps.

Terminal · leadlock-lead-finder

```
$ python3 scripts/pipeline.py --help
usage: pipeline.py [-h] --niche NICHE --city CITY --state STATE
                   [--leads LEADS] [--max-spend MAX_SPEND]
                   [--max-verifications MAX_VERIFICATIONS]
                   [--max-candidates MAX_CANDIDATES] [--ads-only] [--skip-ads]
                   [--skip-maps] [--skip-owner] [--country COUNTRY]
                   [--workers WORKERS] [--out OUT] [--dry-run] [--yes]

Leadlock Lead Finder: the whole run, start to finish.

    1. Facebook Ad Library  → local businesses running ads right now
    2. Google Maps          → every business of that type in the city
    3. Match + dedupe       → one row per business (by website, then phone, then name)
    4. Owner + email        → owner name (Treg), owner email (patterns + Reoon, then Treg)
    5. CSV                  → output/<niche>-<city>-<state>-<time>—ready.csv

Nothing is ever emailed, messaged or uploaded anywhere. The CSV is the end.
```

Real --help output from Leadlock Lead Finder, 2026-10-20 (first 16 lines).

Leadlock.ai

LEADLOCK LEAD FINDER · DRY RUN

See the worst-case cost first.

Terminal · leadlock-lead-finder

```
$ python3 scripts/pipeline.py --niche roofer --city Austin --state TX --leads 25 --max-spend 5 --dry-run
PLAN: 25 'roofer' leads in Austin, TX
  1. Facebook Ad Library [Apify] actor=apify/facebook-ads-scraper, actor_runs=1, max_results=100, max_cost_usd=0.58
  2. Google Maps search [Apify] actor=compass/crawler-google-places, actor_runs=1, max_results=100, max_cost_usd=0.6
  3. Google Maps lookup of advertisers with no website [Apify] actor=compass/crawler-google-places, actor_runs=1,
max_results=25, max_cost_usd=0.15
  4. Owner name + owner email [Treg] businesses_checked_at_most=100, max_cost_usd=5.5
  5. Email verification [Reoon] verifications_at_most=300, approx_cost_usd_if_paid_credits=0.36
  Apify actor runs: 3
  Worst case (Apify + Treg): $6.83   Your cap: $5.00
  The run stops the moment the spend cap is reached.

Dry run: nothing was called and nothing was spent.
```

Nothing runs until you say yes

The dry run calls nothing and spends nothing.

--max-spend is a hard cap

The run stops the moment it's reached.

Real dry-run output from Leadlock Lead Finder, 2026-10-20. No network calls, no keys.

Leadlock.ai

UP NEXT

List done. Now 100 a day.

Then Video 4: how to build the agent you're selling.

EVERY MORNING

01 Pull today's list

02 Clean it, find emails

03 Verify, then reach out
