VIDEO 4 · BUILD AN AGENT

How to build a voice agent.

Prompt, settings, tools, testing. Then the kit that builds it with you.

IN THIS VIDEO

01 The prompt
02 Temperature
03 Turn-taking (VAD)
04 Tools and custom functions
05 MCP servers
06 Testing
07 The Leadlock Agent Kit

Leadlock.ai

THE MAP

Five parts to every agent.

01

Prompt

Who it is, what it does

02

Settings

Temperature, turn-taking

03

Tools

Book, text, update the CRM

04

Connections

Custom functions, MCP

05

Testing

Browser, Simulate, a real call

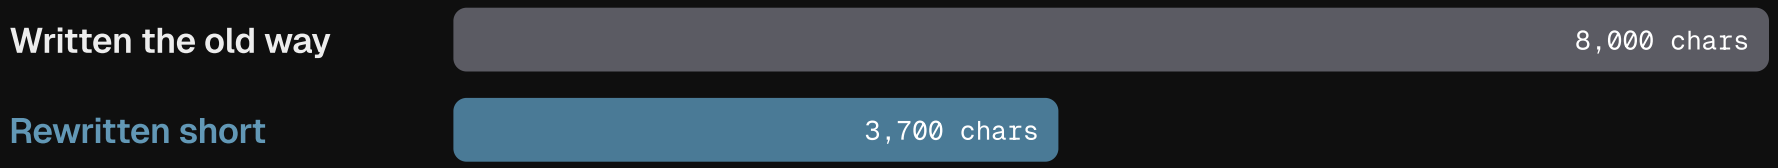

Leadlock.ai

THE PROMPT

Shorter wins.

Every line is something the agent thinks about before it talks.

SAME 39-FIELD INTAKE AGENT, PROMPT LENGTH

Fewer rules. Faster answers, fewer mistakes.

Leadlock agent build notes: a 39-field legal intake, about 8,000 chars written for older realtime models vs 3,700 on Grok think-fast.

Leadlock.ai

THE PROMPT

Section by section.

`# Role and Objective`	Who it is, and the one job on this call
`# Personality`	Tone, pace, how it sounds
`# Context`	The business: services, hours, area
`# Instructions`	How to talk, read things back, use tools
`# Stages`	The call, step by step
`# Example interactions`	A few short sample lines, not scripts
`# Guardrails`	Every ‘never’ lives here, at the bottom

CUTTING IT DOWN

Every line earns its place.

01

Does it need this on this call?

02

Is it already said?

03

Would a new hire need to be told?

If not, delete it. Fix agents by removing lines.

Leadlock.ai

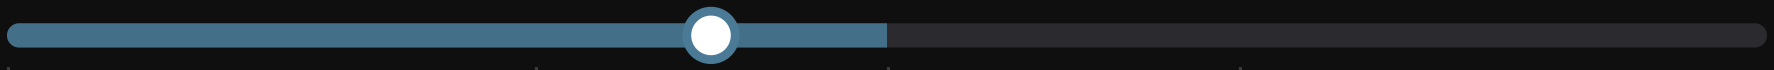

FIVE RULES

Rules that save you hours.

- **Say what to do.** Put every ‘never’ in Guardrails.
- **Intent plus the exception,** not ‘always’ and ‘never’. It takes them literally.
- **Don't write the greeting into the prompt.** It already speaks it on connect.
- **Every {{variable}} needs a default,** or it gets read out loud.
- **Bad test call?** Find the line that caused it. Remove it before adding anything.

SETTINGS

Temperature: how creative it gets.

Focused	Balanced	Expressive	Adventurous
0 to 0.3	to 0.5	to 0.7	above 0.7

Low = on script

Same answer every time. Good for booking and intake.

High = more varied

Sounds looser. Drifts more. Turn it down if it goes off script.

Leadlock agent settings, Voice tab: temperature labels and tooltip. Shown for Grok, OpenAI and Gemini voices.

Leadlock.ai

SETTINGS · VAD

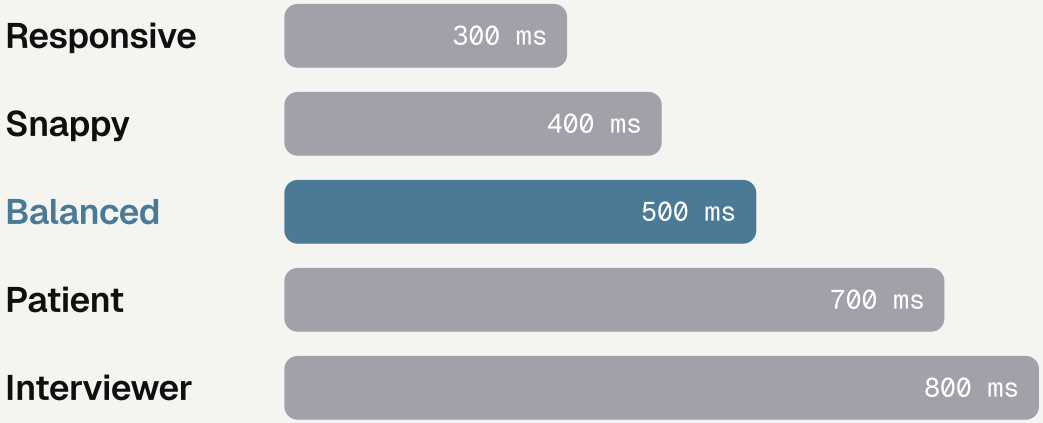

Turn-taking: when it jumps in.

Threshold
How loud counts as speech

Silence
How long a pause before it answers

Padding
Audio kept from just before they spoke

PRESETS: SILENCE BEFORE IT ANSWERS

Interrupting people? Go Patient. Fast sales calls: Snappy.

Leadlock VAD presets (Voice tab, Voice Activity Detection). Gemini voices: keep Response Speed on High; Low causes 15-30 s delays on calls.

Leadlock.ai

FUNCTIONS

Tools let it do the work.

21 built in. GoHighLevel works out of the box.

Calendar

Check availability, book, reschedule, cancel

CRM

Tags, notes, fields, opportunities, workflows

Messages

Send a text, text back later, call out

Call control

End, transfer, schedule a callback

Plus knowledge-base search: answers from their own FAQs and SOPs.

HOW A TOOL CALL SOUNDS

One call, two tools.

CALLER Can you come out Thursday?

`check_availability`

AGENT Thursday I have 10 am or 2 pm.

CALLER 2 works.

`book_appointment → GoHighLevel`

AGENT You're booked for 2 pm Thursday. I'll text you a confirmation.

Leadlock.ai

ANYTHING WITH AN API

Custom functions.

FUNCTION NAME

book_job

DESCRIPTION (READ BY THE AGENT)

Send the caller's name, phone, job type and time to the job board.

PARAMETERS

name · phone · job_type · time

WEBHOOK

POST https://your-endpoint

- **Description:** tells it when to use it
- **Parameters:** what it collects first
- **Speak during execution:** no dead air
- **Send Test Request** before a real call

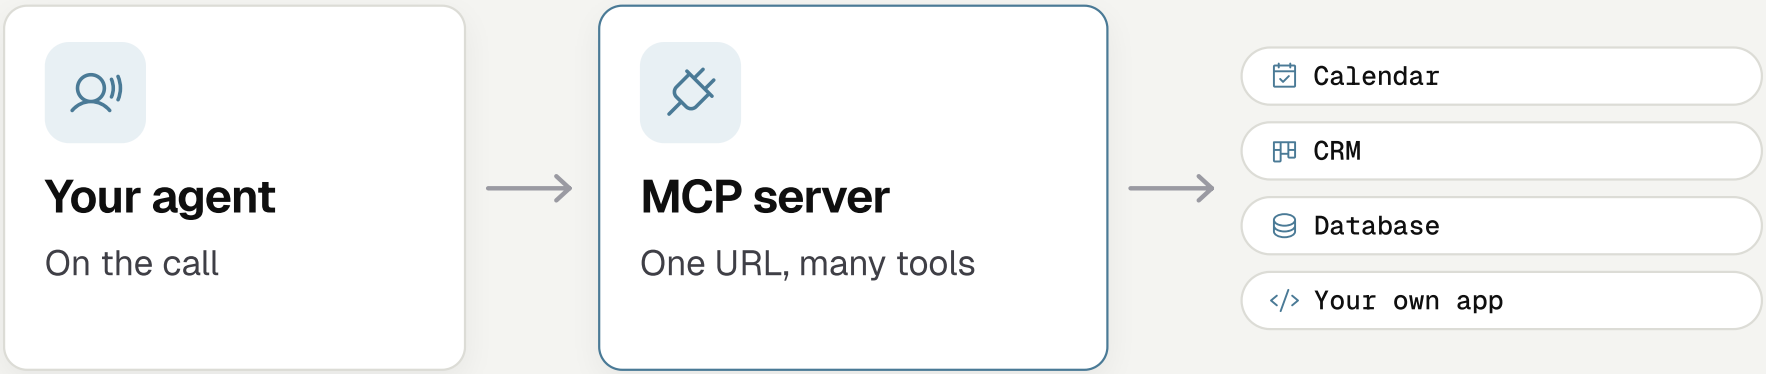

Leadlock Functions Library: Create Custom Function. You can also generate one from a plain-English sentence.

Leadlock.ai

MCP SERVERS

What's an MCP server?

One plug that hands your agent a whole toolbox.

In Leadlock: Remote MCP servers, on Grok voice agents.

Leadlock agent settings: Remote MCP servers (xAI voice provider only).

Leadlock.ai

TESTING

Test it three ways.

01 · FASTEST

Browser test

Test page, Voice, Start Conversation.

02 · AT SCALE

Simulate

An AI caller runs scenarios against your agent. Agency and Pro plans.

03 · THE PROOF

Real test call

Call its number from your own phone.

Leadlock.ai

TUNING

The fix loop.

01

Test call

02

Read the transcript

03

Find the line that caused it

04

Remove or fix that line

05

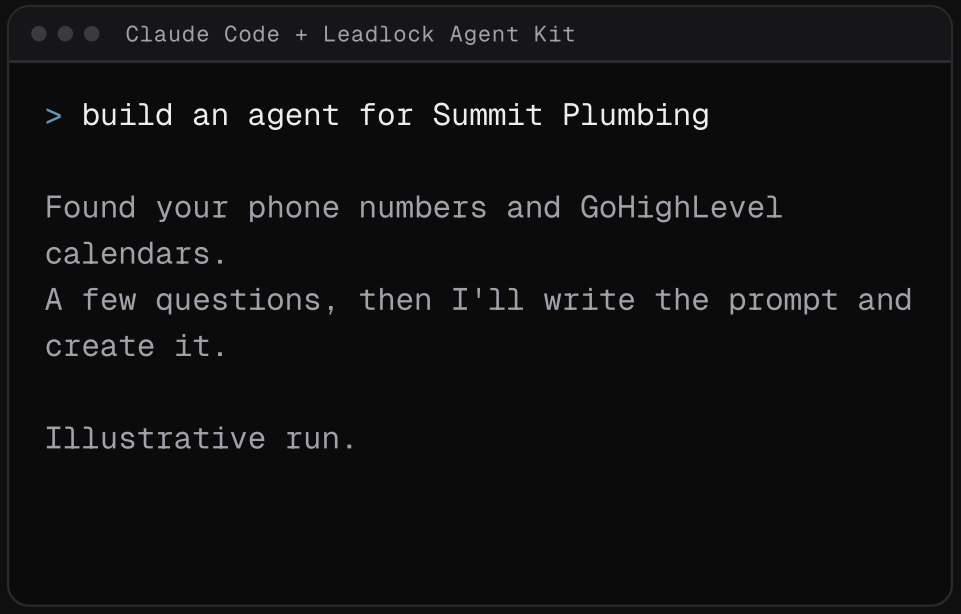

Test again

Most bad behavior traces back to a line already in the prompt.

FREE

The Leadlock Agent Kit.

Claude Code skills that build, tune and test agents with you.

`build-agent`	Guided build
`prospect-demo`	Demo from a URL
`prompt-tuner`	Tune from real calls
`call-audit`	Weekly scorecard
`knowledge-base`	FAQs from their site

`leadlock.ai/agent-kit`

Leadlock.ai

UP NEXT

Now build one. Live.

Video 5: Twilio, a client sub-account, GoHighLevel, your first agent and a real test call.

REMEMBER

01 Shorter prompts win

02 Match turn-taking to the caller

03 Test on a real call
