COURSE 2 - AGENTIC SETUP

Set up Claude Code to build your agents.

Claude Code, Orca, the free Agent Kit, your keys and n8n. Then you build agents in plain English.

THE TOOLS

Claude Code · Orca · GitHub · Leadlock · HighLevel · n8n · Model Context Protocol

IN THIS VIDEO

01 Claude Code
02 Orca
03 The Agent Kit
04 Your keys
05 n8n and its MCP
06 Tour the kit
07 Optional add-on

Leadlock.ai

THE END STATE

Say it in plain English. Claude builds it.

Claude Code · inside the Agent Kit · illustrative

```
> build me an agent for Summit Plumbing
  Using the build-agent skill
  Reading learnings/ first
  Finding your phone numbers and GHL calendars
  A few questions, then I write the prompt and create the agent
```

Free repo The exact setup is next. Link below.

Leadlock.ai

THE SETUP

How the pieces connect.

Leadlock.ai

STEP 1 · CLAUDE CODE

An AI that works in your files.

Claude Code

Not a chat window

It reads and edits files and runs commands in your terminal.

Needs a paid Claude plan

Pro or Max.

code.claude.com/docs/en/setup

Terminal · install commands

```
# Mac
$ curl -fsSL https://claude.ai/install.sh | bash

# Windows PowerShell
PS> irm https://claude.ai/install.ps1 | iex

# then log in, and prove it
$ claude
$ claude --version
```

code.claude.com/docs/en/setup, 2026-10-23: native install commands; Claude Code needs a Pro, Max, Team, Enterprise or Console account.

Leadlock.ai

STEP 2 · ORCA

Several Claude sessions, side by side.

Orca

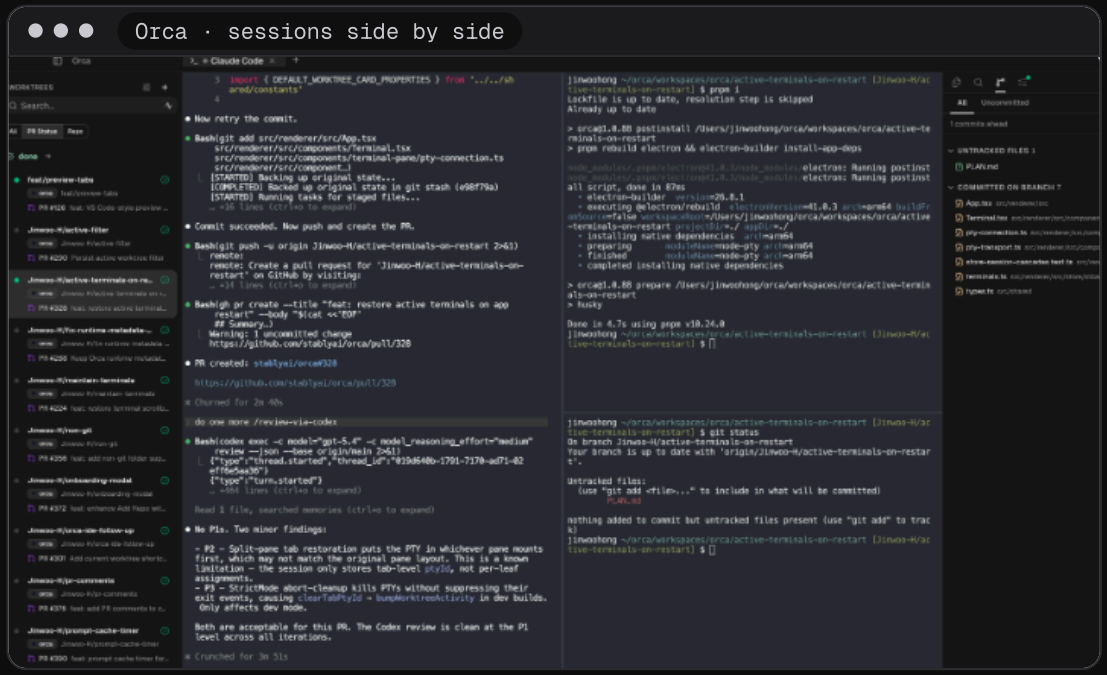

Its own copy each

Free app. Every session works on its own copy of the repo.

Nothing collides

One builds a demo while another tunes an agent.

onorca.dev/download

Orca's own product screenshot (onorca.dev). Free and open source, MIT license.

Leadlock.ai

STEP 3 · THE AGENT KIT

The Leadlock Agent Kit. Free on GitHub.

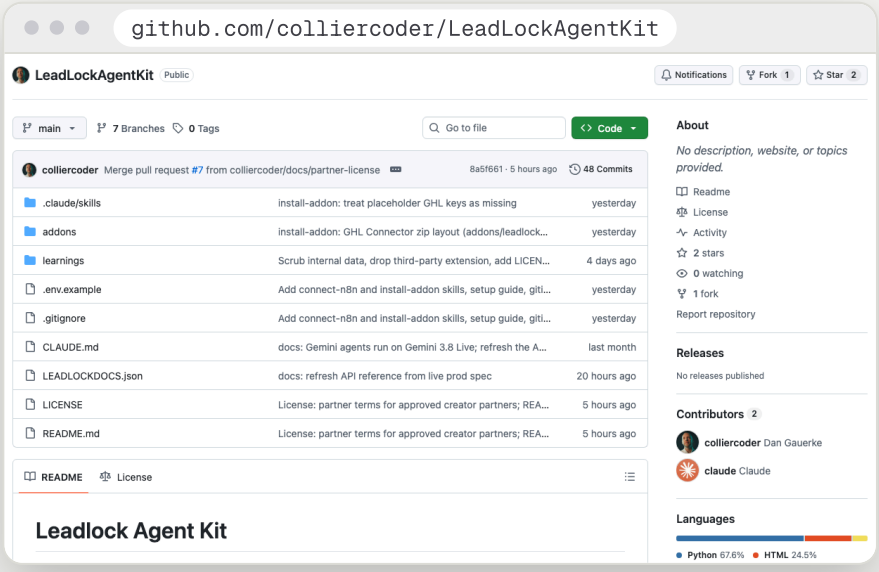

GitHub Leadlock

Claude Code skills for Leadlock

Build, demo, tune and audit agents. Just your Leadlock API key.

github.com/colliercoder/LeadLockAgentKit

leadlock.ai/agent-kit

STEP 3 · GET THE KIT

Clone it. Open it in Orca.

Terminal · clone commands

```
$ git clone https://github.com/colliercoder/LeadLockAgentKit.git
$ cd LeadLockAgentKit
$ cp .env.example .env
```

Orca

Add it as a repo

In Orca

Start a Claude session

Inside the kit

Add your keys

Into .env, next

Leadlock.ai

STEP 4 · YOUR KEYS

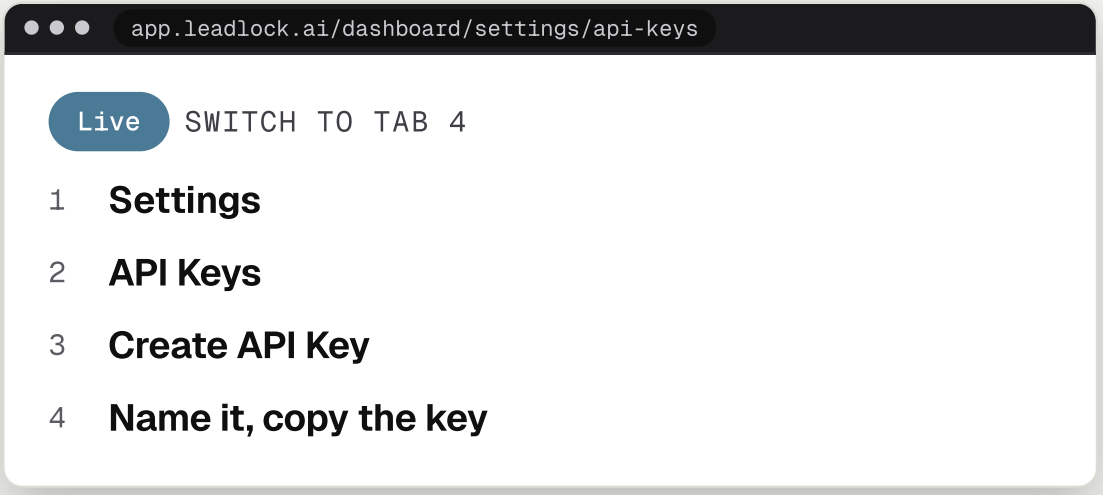

Your Leadlock API key.

Leadlock

PASTE INTO .ENV

LEADLOCK_API_KEY

Starts with sk_live_. Blur it on camera.

STEP 4 · YOUR KEYS

Your GoHighLevel token.

HighLevel

PASTE INTO .ENV

GHL_PIT
GHL_LOCATION_ID

The location ID is the long ID in your GHL URL.

app.gohighlevel.com

app.gohighlevel.com · your sub-account

Live SWITCH TO TAB 5

1 **Settings**

2 **Private Integrations**

3 **Create New**

4 **Pick the scopes, copy the token**

Leadlock.ai

STEP 4 · CHECK IT

Say “check my setup”.

It tests your key

And lists what you can run.

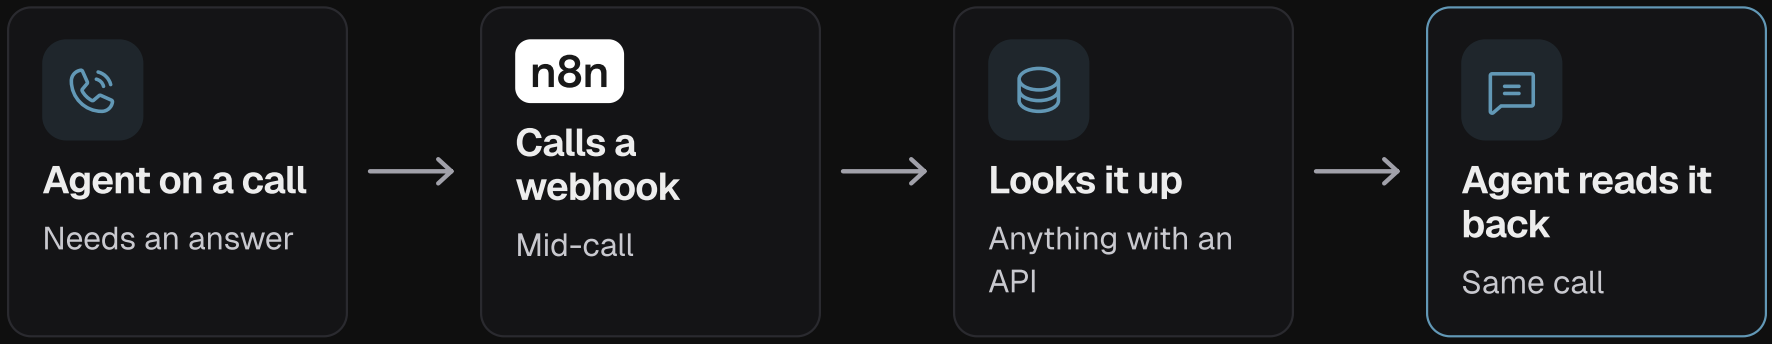

.env stays on your machine

It is never pushed to GitHub.

Leadlock.ai

STEP 5 · N8N

n8n: the backend for custom functions.

Sign up for n8n Cloud

n8n.io

Leadlock.ai

STEP 5 · THE N8N MCP

Connect n8n to Claude.

n8n | Model Context Protocol

01 Say “connect n8n”

02 Settings > Instance-level MCP

03 Enable MCP access

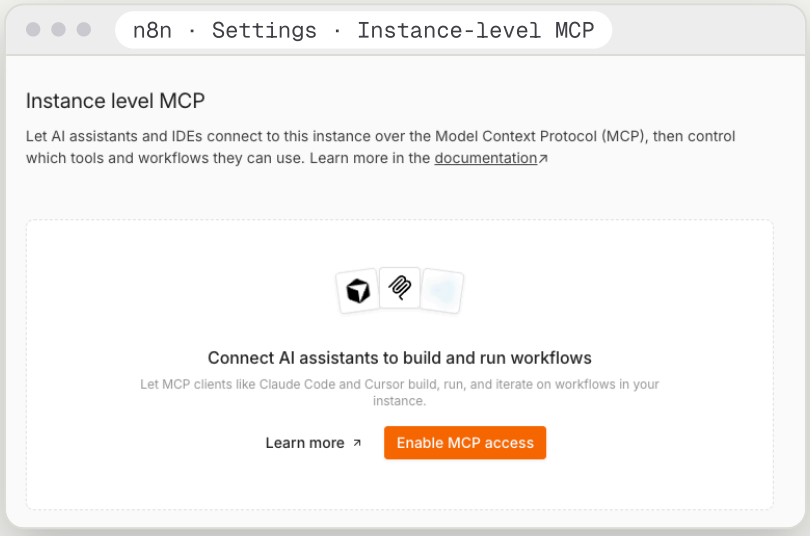

04 Connect a client (OAuth)

IN CLAUDE

`/mcp > n8n > Authenticate`

Then “list my n8n workflows”.

docs.n8n.io/connect/connect-to-n8n-mcp-server

Screenshot from n8n's own docs, Connect to the n8n MCP server, 2026-10-23 (the old docs link redirects here).

Leadlock.ai

TOUR THE KIT

Skills do the work. Learnings remember.

.CLAUDE/SKILLS/ · ONE FOLDER PER SKILL

knowledge-base-builder
talking-website

LEARNINGS/ · THE KIT'S MEMORY

Terminal · real output, kit main

```
$ ls -1 learnings/
agent-to-agent-call-testing.md
anti-patterns.md
best-practices.md
bugs.md
index.md
platform-gaps.md
```

git pull for updates

Your keys and add-ons are never touched.

github.com/colliercoder/LeadLockAgentKit, 2026-10-23: the skills folder on GitHub, and ls -1 learnings/ on the main branch.

Leadlock.ai

OPTIONAL ADD-ON

Want GoHighLevel way easier?

GHL command-line tool

With its own Claude skill, so Claude builds GHL workflows for you.

Chrome extension

Works in your GHL account with you.

Unzip into addons/, say “install my add-on”

It stays private. Never pushed.

The Launch Bundle

leadlock.ai/store

Leadlock.ai

WRAP

Set up.
Now Claude builds.

YOU NOW HAVE

01 Claude Code
02 Orca
03 The Agent Kit
04 Your keys
05 n8n, connected

NEXT

01 Agents and demos on demand
02 Better versions from real transcripts
03 n8n custom functions

Leadlock.ai
