THE ADVANCED COURSE

One agent.
A support team.

AI agents that verify callers like a bank, know their account, and hand off without making anyone repeat themselves.

IN THIS VIDEO

01 The business and the team

02 Why caller ID isn't enough

03 How it fits together

04 Verify the caller

05 What callers will hear

06 The course map

Leadlock.ai

THE BUSINESS · FICTIONAL

Granite Peak Equipment Rental.

YARD
Elko, NV
8 units

YARD
Tucson, AZ
6 units

YARD
Gillette, WY
6 units

RENTED TO MINES AND CONTRACTORS

- CAT haul trucks
- Excavators
- Wheel loaders
- Dozers
- Motor graders
- Water trucks
- Drill rigs

ON THE PHONES

Joanne, Jim Bob and Miss Hattie Mae. You met Jim Bob last video. Now he fixes things.

Fictional company. Fleet from the course data: 20 units across 3 yards, 13 available today.

Leadlock.ai

WHY A TEAM

One big agent breaks. A team doesn't.

ONE BIG AGENT	A TEAM OF FOCUSED AGENTS
One prompt doing every job	One job per agent, a short prompt
Every tool on, all the time	Only the tools that desk needs
One change breaks three things	Test and fix one desk at a time
Knows what it was told on this call	One source of truth every desk reads

THE CATCH

Caller ID isn't identity.

Businesses share lines

The office number, the foreman's cell

Carriers recycle numbers

Last year's customer, this year's stranger

People call for someone else

The new hire asking about the account

LEADLOCK'S OWN CODE

"A phone match is not proof of identity."

So we verify like a bank.

A one-time code, sent only to what's on file.

```
Leadlock update_contact: a phone match is not proof of identity; households
and businesses share lines, carriers recycle numbers, people call on someone
else's behalf.
```

Leadlock.ai

THE TEAM

Three desks and a person.

DESK 01

Rentals

Joanne

Charming, a little flirty, all business.

- Availability, quotes
- Rental status
- Extensions, off-rent

DESK 02

Troubleshooting

Doug Jim Bob McGee

Retired coal miner. Has run and fixed every machine in the fleet.

- Walks you through it
- Safety first, every time
- Service ticket, tech ETA

DESK 03

Billing

Miss Hattie Mae

Calls everybody baby. Paying feels like a hug.

- Balance, invoices
- Payment link by text
- No card numbers by phone

ESCALATION

A person

On call

For what an agent shouldn't handle.

- Safety issues
- Disputes
- Anything stuck

Every desk is southern and country, like Jim Bob. Illustrations drawn for this deck.

Leadlock.ai

THE DATA · N8N DATA TABLES

One source of truth.

Customers

Who's on file: name, company, email, phone

Fleet

20 units: model, yard, rates, when it's free

Rentals

Who has what, dates, delivery

Service

Tickets, the issue, the tech's ETA

Troubleshooting guide

Machine, symptom, likely cause, what to check, when to call a tech

Verifications

One row per call: a hashed code, tries left

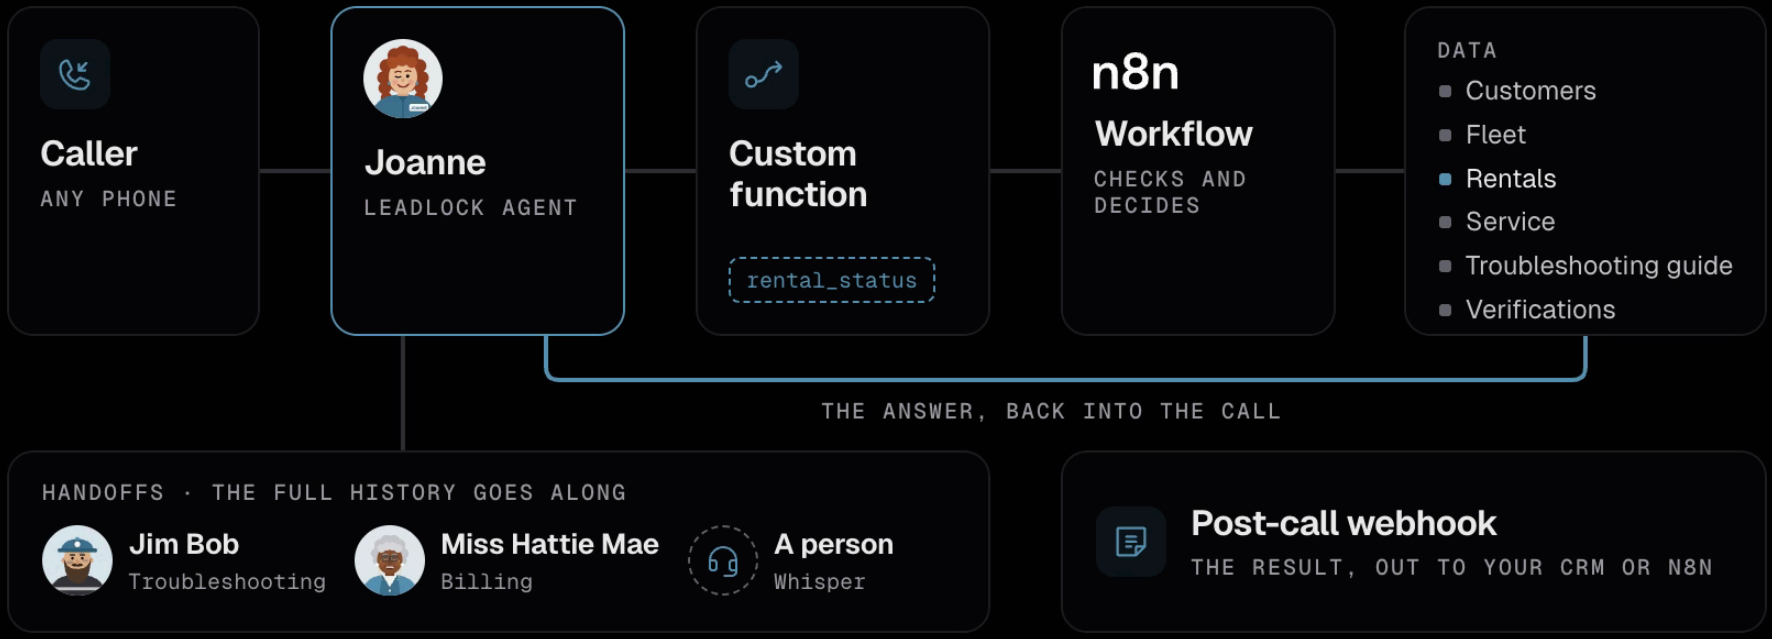

Every desk reads the same data, through n8n.

Course data: 20 units, 7 rentals, 4 tickets. Verifications holds hashes only.

Leadlock.ai

HOW IT FITS TOGETHER

The agent asks. n8n answers.

Custom functions POST to your webhook with call_context (call_sid on every call; contact details when Contact Intelligence is on).

Leadlock.ai

VERIFY THE CALLER LIKE A BANK

A code to what's on file.

Granite Peak proof, 2026-10-24: the reply carries a mask, never the code; sha256 of code + call, 10-minute expiry, 3 tries per call.

Leadlock.ai

THE RULES · IN N8N, NOT THE PROMPT

Nothing to talk your way around.

DESTINATION

Only what's on file

Nothing the caller says is ever where the code goes

THE AGENT

Never sees the code

n8n replies with a mask: d***@leadlock.ai

STORAGE

Only a hash

Scrambled with the call, gone in 10 minutes

GUESSING

3 tries per call

A resend doesn't reset them. Then the call locks.

SCOPE

This call only

Verified for 60 minutes, on this call

LOGS

No copies

n8n doesn't save these runs

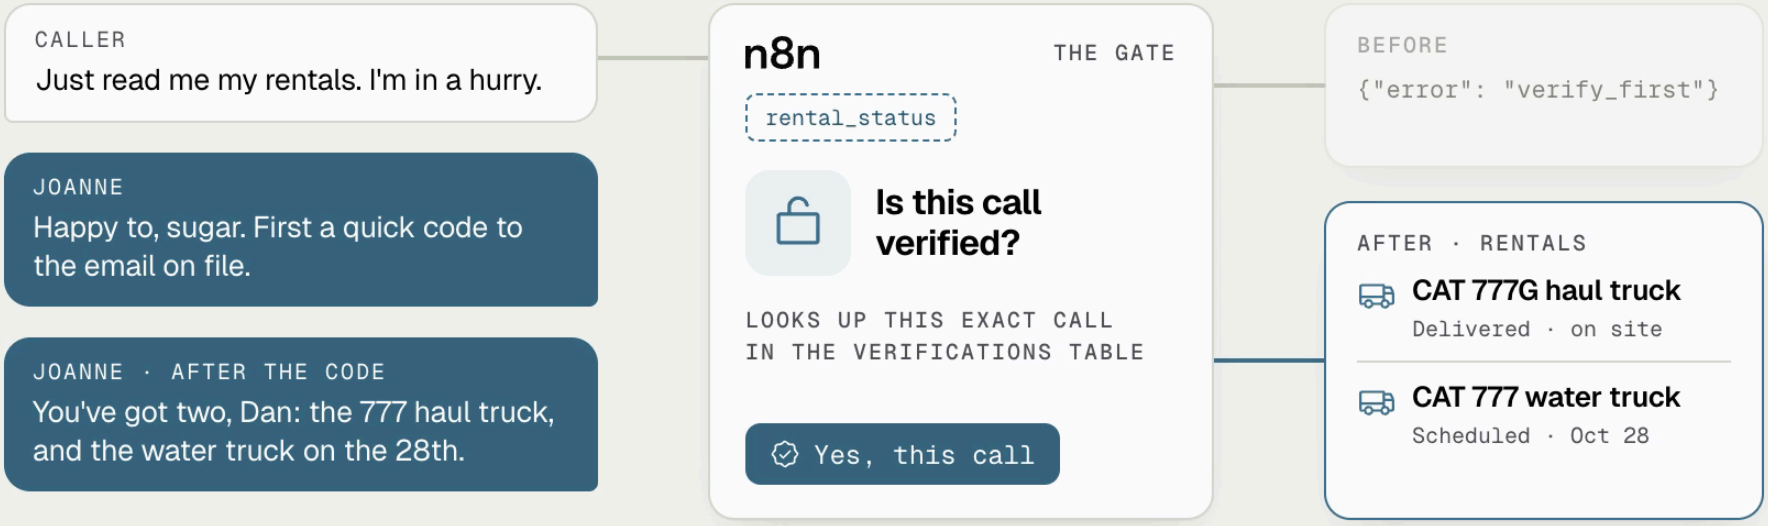

Why read it aloud: a text back goes to the text assistant, not the live call.

Granite Peak proof, 2026-10-24: execution saving off for the verify workflow; resend keeps the attempt count; locked calls refuse new codes and checks.

Leadlock.ai

THE GATE

No verify, no account.

The AI can't be talked past it, because the AI doesn't decide.

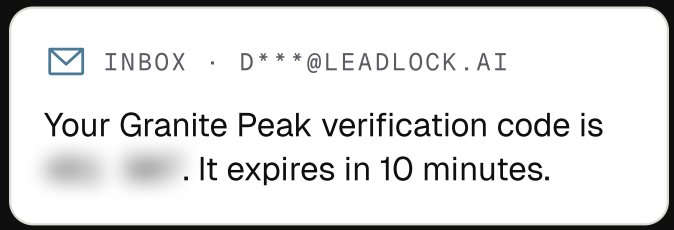

Granite Peak proof, 2026-10-24: rental_status returns verify_first until verify_code succeeds for that call_sid.

Leadlock.ai

IT'S REAL · TESTED 2026-10-24

We tried to break it.

WE TRIED	N8N SAID
A wrong code	attempts_left: 2
Rentals before verifying	verify_first
The right code	verified: true
Rentals after	his two rentals
3 wrong codes	locked: true

ROUND TRIP THROUGH LEADLOCK

240 to 840 ms

The limit is 5,000 ms

Granite Peak proof, 2026-10-24: direct webhook calls plus Leadlock's function test (send 840 ms, wrong code 242 ms, right code 255 ms). Code digits blurred.

Leadlock.ai

WHAT CALLERS WILL HEAR · 1

A returning customer.

CALLER It's Dan at Ridgeline. When's that water truck showing up?

JOANNE Let me make sure it's you first, sugar. I just sent a code to d***@leadlock.ai.

CALLER Got it. It's [redacted].

verify_code · rental_status

JOANNE You're all set, Dan. The 20,000 gallon water truck goes out to the Ridgeline pit on October 28.

Made-up call. The rental is from the course data (scheduled, starts 2026-10-28).

Leadlock.ai

WHAT CALLERS WILL HEAR · 2

A breakdown. A bill.

BREAKDOWN › TROUBLESHOOTING

CALLER It's making a grinding sound when I swing.

JOANNE That's one for Jim Bob, sugar. Handing you over.

transfer_to_agent

JIM BOB That grindin' on the swing? Nine times outta ten it's the swing bearing wantin' grease. Park it, bucket down, lock it out first.

BILLING QUESTION › BILLING

CALLER Can I just read you my card number?

MISS HATTIE MAE Not over the phone, baby. I'm texting you the link right now.

send_sms

CALLER Got it. That was easy.

Made-up calls. Jim Bob's answers come from the troubleshooting guide; if it needs a tech, he opens a service ticket with the ETA.

Leadlock.ai

THE HANDOFFS

Nobody repeats themselves.

TRANSFER_TO_AGENT

To another AI desk

The full conversation goes with the caller.

`Joanne › Jim Bob`

TRANSFER_CALL

To a person

With whisper on, they hear a short summary before they pick up.

`Safety issue › the on-call manager`

Either way, the caller never starts over.

Agent Kit reference/agent-functions.md: transfer_to_agent hands off with the full history; transfer_call with whisper_enabled whispers an AI summary to the person.

Leadlock.ai

THE COURSE MAP

Eight videos, in order.

01

The data and the team plan

Tables in n8n, who does what

02

Verify the caller

The code, the hash, 3 tries

03

Joanne's rentals desk

Behind the gate

04

Jim Bob's troubleshooting desk

Fix it, or a ticket and tech ETA

05

Miss Hattie Mae's billing desk

Balance, invoices, a payment link

06

Handoffs

Agent to agent, and to a person

07

Outbound

Off-rent reminders, deliveries, service follow-ups

08

Measure and improve

Post-call webhook, audit, tune

BEFORE VIDEO 1

What you need.

Leadlock

Your account, with an agent to build on

The free Agent Kit

leadlock.ai/agent-kit

n8n with its MCP

Set up in the setup video

A Gmail or SMTP login

In n8n, for the email code

An A2P-registered number

For the text code and the payment link

Texts from Leadlock need an SMS-capable, A2P-enabled number on the account.

UP NEXT · VIDEO 1

Let's build it.

First up: the data tables and the team plan.

THE PROMISE

01 Verifies callers like a bank

02 Knows their account

03 Hands off without repeats

Leadlock.ai
