SUPPORT TEAM · VIDEO 2

$46,000

Behind one 6-digit code.

Verify callers like a bank.

Then open the gate.

Leadlock.ai

WHAT THE CODE PROTECTS

Every account answer is money.

ON RENT

$140,400

A month, all accounts.

OPEN INVOICES

$46,000

One customer.

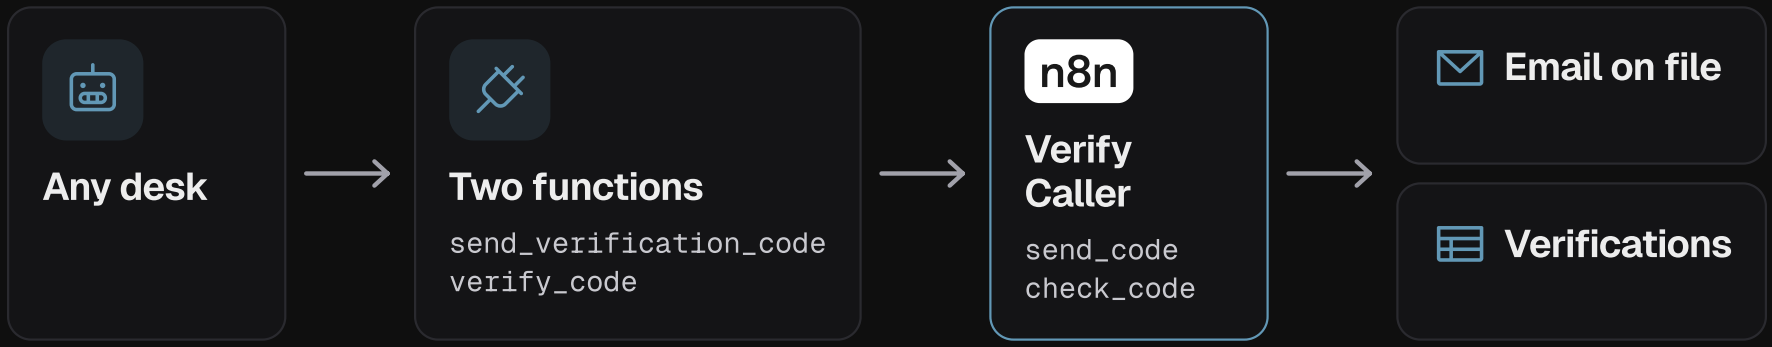

ONE HAUL TRUCK

$40,800

A month. Gated.

WHAT WE'RE BUILDING

The agent asks. n8n decides.

The agent only hears yes or no.

Leadlock.ai

THE WORKFLOW · GRANITE PEAK - VERIFY CALLER

Two paths. send_code and check_code.

SEND_CODE

- Makes a 6-digit code
- Stores only a hash
- Emails what's on file

CHECK_CODE

- Hashes what they read
- Marks the call verified
- 3 wrong: locked

Only your agents get in.

THE RULES · IN N8N, NOT THE PROMPT

Nothing to talk your way around.

DESTINATION
Only what's on file

THE AGENT
Never sees the code

STORAGE
Only a hash

GUESSING
3 tries per call

SCOPE
This call only

LOGS
No copies

Leadlock.ai

TWO CUSTOM FUNCTIONS

What goes in. What comes back.

send_verification_code

```
Agent sends first name, last 4,
            email or sms
n8n replies
{ "sent": true,
  "to": "d***@leadlock.ai" }
```

verify_code

```
Caller reads "481 907"
n8n replies
{ "verified": true,
  "company": "Ridgeline Aggregates" }
or { "verified": false,
     "attempts_left": 2 }
```

THE GATE · N8N DECIDES, NOT THE AI

No verify, no account.

Behind the gate

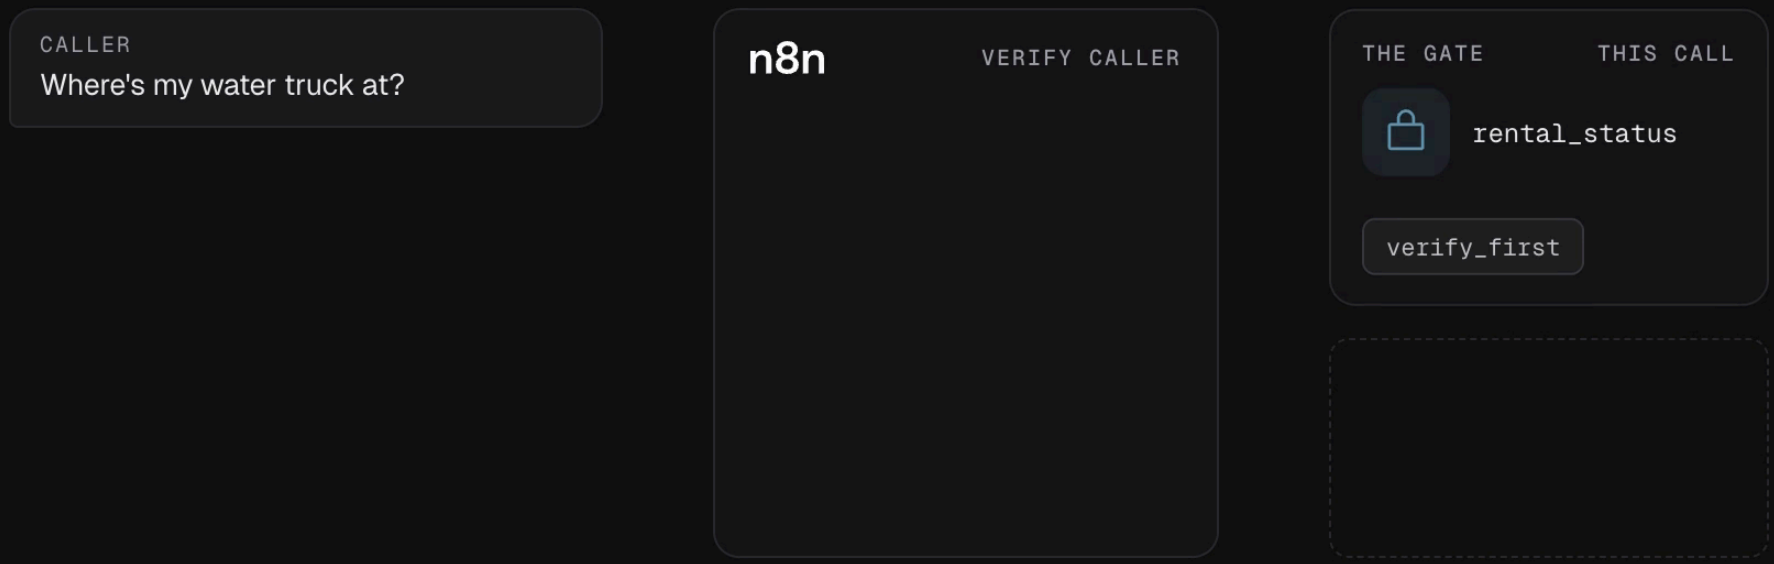

rental_status
extend_rental
call_off_rent
create_service_ticket
service_ticket_status
account_balance
send_payment_link

Open to anyone

fleet_availability
rental_quote
troubleshoot_machine

HOW IT WORKS

Code. Read aloud. Verified. Open.

Leadlock.ai

BEFORE YOU START

You're already on file.

n8n can send email

Gmail or SMTP, in n8n

You are customer C-1001

Set up in video 1

You own a $40,800 truck

On rent, at Ridgeline

SAY THIS

Install it. Then have it explained.

Say this · Claude Code, in the Agent Kit

```
> install the Verify Caller step
  Pre-flight: Leadlock key, n8n, email credential
  Workflow Granite Peak - Verify Caller: published
  Functions: send_verification_code, verify_code
  Emailed one real code to d***@leadlock.ai. Read it back?
```

Say this · Claude Code, in the Agent Kit

```
> Walk me through the Granite Peak - Verify Caller workflow in plain English:
  what happens on send_code, what happens on check_code, and where each
  rule is enforced.
```

Leadlock.ai

TEST IT · TRY TO BREAK IT

Wrong first. Then lock it.

READ THE CODE BACK, WRONG FIRST

> 000000

SUCCESS

2 tries left. Then verified.

LOCK IT

> Send me a new verification code on a new test call, then check three wrong codes in a row and show me what comes back.

SUCCESS

Locked. Resend refused.

THE GATE

verify_first, then your rentals

GOTCHAS

Every fix is one line.

No email arrives

Credential, then spam

Right code, still false

Same call, within 10 minutes

Locked

Start a new test call

Nothing in Executions

On purpose: history is off

WHAT YOU BUILT

The lock on a $15K build.

Verify Caller, published

Two functions, every desk

A gate on every account

Leadlock.ai
